PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/720,856

Applicant(s)

ROBERTS, TIMOTHY

Examiner

Rasheedat O. Koletowo

Art Unit

2609

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

This is in response to the application filed on November 24th, 2003, where applicant has filed application No. 10/720,856 claiming priority from a foreign application filed on February 8th, 2002. The following Office Action is based on the application filed on November 24th, 2002 in which claims 1-20 and figure 1 are presented for examination.

Status of Claims

Claims 1 to 20 are pending, of which claims 1,8,11 and 17 are in independent form.

Specification

2. The Background, Summary and Detailed description of the invention in the disclosure is objected to because of the following informalities: The acronyms IP, PDP, IMS, ISP, GGSN, OSA, URL, TCP, WAP, UMTS and QoS should be changed to Internet Protocol (IP), Packet data Protocol (PDP), Internet Protocol multimedia Subsystem (IMS), Internet Service Provider (ISP), Gateway GPRS Service Node (GGSN), Open Service Architecture (OSA), Universal Resource Locator (URL), Transmission Control Protocol (TCP), Wireless Access Point (WAP) or Wide Area Paging (WAP), Universal Mobile Telecommunications System (UMTS) and Quality of Service (QoS) respectively. More so, every instance of the aforementioned acronyms should be changed in the specification.

Appropriate correction is required. See MPEP § 608.01(b) or CFR 1.71.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. **Claims 2-7,8-10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

Regarding claims 2-7, the phrase "providers," and "users" recited in lines 1 and 2 of claim 2, renders the claims indefinite because there is insufficient antecedent basis for this limitation. It is unclear as to whether a different or a plurality of "providers" for transporting packets within a network corresponds to a user as stated in claim 1 or for a plurality of users. Claims 3-7 are dependent upon claim 2, therefore the rejections under 35 USC 112 also applies to claims 3-7 for their dependences on claim 2.

Regarding claims 8-10, the phrase "the provider," recited in line 4 of claim 8, renders the claim indefinite because there is insufficient antecedent basis for this limitation. It is unclear whether the applicant is referring to a previously mentioned "providers" as stated in claim 2. Claims 9-10 are dependent upon claim 8, therefore the rejection under 35 USC 112 also applies to claims 9-10.

Art Unit: 2609

Claim 9 recite the limitation "the operator" in line 2. There is insufficient antecedent basis for this limitation in the claim. It is unclear as to whether there is a new or arbitrary operator in the method additional to the network operator in claim 8 or if this is in fact the same operator.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 11-13 and 17-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Nauer et al. (US 2002/0161601 A1), hereinafter Nauer.

Re claim 1, Nauer (US 2002/0161601 A1) discloses in Fig. 3 a billing method wherein the method comprises;

providing a set of rules [the billing data included in the billing data record type relate to the billing parameters, their value, dimension, see paragraph 54, lines 5-7] and determining from said rules and each packet address, a respective billing tariff and account for that packet [and the agreed tariffs 17 for the billing parameters, see paragraph 54, lines 7-9].

Re claim 2, Nauer (US 2002/0161601 A1) discloses a method wherein account details for network users and providers of goods and services **[the creation of billing data record type and the collection of associated use data, creation of party-specific billing data records]** are stored in a common accounts database **[can be combined into one database transaction in each instance, and can be performed distributed within the network, see paragraph 58, lines 6-11 and Fig. 5]**

Re claim 3, Nauer (US 2002/0161601 A1) discloses a method wherein; transfers of credit between accounts stored in the accounts database are determined from coupons generated for each transaction **[from the billing data record which contains the billing parameter based on cost acceptance by operators and user, it is possible to make an accurate list of all the cost and credits for the subscriber and of all the costs and credits for the operators thereof, see paragraph 20, lines 1-6].**

Re claims 4 and 12, Nauer (US 2002/0161601 A1) discloses a method wherein network users have prepaid and postpaid accounts **[creation of a billing model for each subscriber may be used for any type of billing, such as Prepaid, or Postpaid via a bank or credit, see paragraph 29, lines 1,6-8].**

Art Unit: 2609

Re claims 5 and 13, Nauer (US 2002/0161601 A1) discloses a method wherein each user account is accorded a respective credit limit **[each data record is used as an input for the party-specific billing processes where the use data used in the billing such as immediate billing, or for the last 30 days have been stipulated, see paragraph 88, lines 1-5]**

Re claim 6, Nauer (US 2002/0161601 A1) discloses a method wherein user validation is performed prior to completion of a transaction **[each subsidiary data record type is valid until the connections are ended or a rule prescribed for the billing parameters applies as an option. The criteria crucial for end of the validity of a subsidiary data record type also can be administered; see paragraph 38, lines 7-10, 15-16]**

Re claim 7, Nauer (US 2002/0161601 A1) discloses in the background of the invention, a method wherein

The network is a wireless network **[a multimedia network results from connecting mobile radio networks and the Internet to make use of internet services, applications and contents in the mobile radio network, see paragraph 3, lines 1-4]**

Re claim 8, Nauer (US 2002/0161601 A1) discloses a method wherein

Art Unit: 2609

On-line shopping in which the cost of goods and services purchased by a customer are debited to that customer's prepaid or postpaid account with a network operator **[creation of a billing model for each subscriber may be used for any type of billing, such as Prepaid, or Postpaid via a bank or credit, see paragraph 29, lines 1,6-8]**, and a corresponding credit is applied to an account held by the provider of those goods or services **[a payment flow going to a subscriber or operator can be equated, to a credit to his/her account and a payment flow leaving the subscriber or the operator is comparable to a debit to his/her account, see paragraph 17, lines 4-7]**.

Re claim 9, Nauer (US 2002/0161601 A1) discloses in the background of the invention a method wherein

a transaction charge is retained by the operator **[a billing method for the use of multimedia network which permits rapid settlement of accounts between, any number of operators/subscribers and allows the statement items to be associated with a selected transaction step, see paragraph 11, lines 1-6 and Fig. 4; 24b]**

Re claims 10 and 14, Nauer (US 2002/0161601 A1) discloses a method meeting all preceding limitations including a method, wherein;

A supplier of goods and services is credited with a portion of the network operator's revenue for the transport of the packet traffic relating to a transaction **[a transaction step may include the use of service with content and at the same time**

Art Unit: 2609

for not only the user but also an operator of the portal, an operator for the content, an operator for the access network and an operator for the transport network to be involved in between whom accounts need to be settled; see paragraph 10, lines 5-8].

Re claim 11, Nauer (US 2002/0161601 A1) discloses a method wherein

Providing combined billing of a communications packet network user for the delivery of communications services to that user **[a subscriber in the multimedia network can use both the mobile radio service and an Internet access service from a served operator (convergent billing), see paragraph 21, lines 3-5]** and for the on-line purchase of goods and services by the user via the communications network, **[communication services and for on-line purchases of goods and services via communication network, see paragraph 71, lines 4-5]** wherein the method comprises; providing a set of rules, **[the billing data included in the billing data record type relate to the billing parameters, their value, dimension, see paragraph 54, lines 5-7]** and determining from said rules and each packet address, a respective billing tariff and account for that packet **[and the agreed tariffs 17 for the billing parameters, see paragraph 54, lines 7-9].**

Re claim 15, wherein "said network comprises a wireless network" is substantially similar to claim 7, thus the basis of the rejection is based on rationale stated in claim 7

Re claim 17, an apparatus for processing the method disclosed in claim 1.

Therefore the rejection from claim 1 also applies to claim 17.

Re claim 18, an apparatus for processing the method as disclosed in claims 4 and 5. Therefore the rejection from claims 4 and 5 applies to claim 18.

Re claim 19, an apparatus for processing the method disclosed in claim 5. Therefore the rejection from claim 5 also applies to claim 19.

Re claim 20, an apparatus for processing the method as disclosed in claims 7 and 15. Therefore the rejection from claims 7 and 15 applies to claim 20.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nauer (US 2002/0161601 A1) in view of the examiner's prior knowledge of the art.

Re claim 16, Nauer (US 2002/0161601 A1) discloses a method meeting all preceding limitations of the parent claim, however Nauer (US 2002/0161601 A1) fails to explicitly disclose of a method wherein;

“software in machine readable form on a storage medium and arranged to perform the method” as stated in the parent claim.

A multimedia wireless network mainly uses Third generation (3G) mobile radio networks, which already includes efficient use of Internet services as well as Internet applications and contents. For a person skilled in the art, implementing software development for integrated multimedia networks is considerably cost effective, and efficient in terms of operation as supposed to hardware implementations. Thus, it would have been obvious to one of ordinary skill in the art at the time to be motivated to incorporate software in a computer readable form in the method of Nauer (US 2002/0161601 A1) to enhance decrease implementation cost and to enhance speed and efficiency.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2609

Tubinis (US 2002/0014367 A1) discloses a method and system for processing a subscriber's account for a multimedia service via communications networks. The information regarding the Billing Collector and Multiplexer device and billing system device are relevant materials.

Battle et al. (US 2003/0041022 A1) discloses a method that utilizes an electronic money instrument for transactions online. The information regarding e-money for conducting transactions such as transfers and payment are of relevance.

Ruckart et al. (US 2003/0086545 A1) discloses a method and system for paying for multimedia communications with prepaid credit. The information regarding system for storing data, controlling application software and the prepaid module are of relevance.
